Alex Baur alexbaur.us@outlook.com https://t.me/NET_developer2 U.S. citizen

PROFESSIONAL SUMMARY:

- 30+ years of Experience in Software Engineering and Development. Core domains expertise: Manufacturing, Finance, Agriculture.
- C# .NET Full-stack developer with 15 years of experience in the IT field in the USA - analysis, design, coding, testing, deployment and maintenance of SDLC phases of enterprise business web applications using OOP concepts, SOLID principles and design patterns.
- Interacting with stakeholders, gathering requirements, managing the team and making technical decisions.
- Hands-on experience in migrating web applications from .NET Framework to .NET Core, from a monolithic structure to a microservices architecture for the purposes of system integration.
- Strong programming skills in C# using SOA and N-tier architecture with multithreading, asynchrony, collections, interfaces, transactions, logging, automated testing and exception handling.

EDUCATION:

Ph.D. in Economics (Research Institute of the Southeast)
M.S. in Economics (State Economic University)
M.S. in Management (Academy of Public Service)
M.S. in Mechanical Engineering (State Technical University)
Certificates: ITIL, SLA, Quality Management, Angular JS certificate.

RELEVANT WORK EXPERIENCE:

Senior Software Developer – *Software development company (permanent, remote), USA/abroad* *Dec 2024 – Present*

Supported the legacy solution (20 years of age) – .NET Framework Web Apps, Class Library projects, Console Apps, Web Services (68 projects) , custom Queue (148 assemblies).
Installed and configured the runtime environment, including Oracle DB 11g r2 Enterprise (Windows 10/11) and Express (Docker, Podman containers). Performed export/import of database dumps, created triggers, stored procedures, PL/SQL types and functions for the Oracle database (28 Tb, 960 tables).
Decompiled, updated, reassembled, and debugged dozens of assemblies, including services without code.
Used tools/technologies: PL/SQL requests, triggers, storage procedures and functions, ETL/ELT operations, Visual Studio, ILSpy (the open-source .NET decompiler), C#, ASP.NET MVC Framework 4, ECM7 framework and migrator, WCF services and integrations, ExtJs 2/3, ECMAScript, ORM NHibernate, Postman (API platform), curl, StimulReportDesigner (reports), ELMAH (Error Logging Modules and Handlers), LINQ, XML, DocumentFormatOpenXml, Razor, DTO, LDAP authentication, GitHub, Jira, Confluence . Published to IIS 10.

Software Developer – *John Deere (contract, onsite), East Moline, IL* *Mar 2024 – Aug 2024*

Developed, maintained and supported the .NET Framework MVC Web Applications: Dealer Central and Support Portal. Updated solutions from legacy versions of frameworks (2018) to current versions. Migrated projects from .NET Framework 4.7.2 to .NET 8. Developed and refactored dozens of reports (SheetJS, Chart.js, MS OpenXML, HTML). Implemented async/await Web API/jQuery/ServiceNow requests from C#. Improved the performance of C# requests to ServiceNow by 2 – 5x times (used WSDL). Developed and updated UXFramework controls. Developed new multiselect dropdown control with checkboxes for UXFramework (jQuery3.7 + Bootstrap5). Developed new feature for textbox controls (C#, async requests to ServiceNow, Memory Caching - fast background searching by words dynamically entered in textbox in real time – dynamical showing KBs). Developed the Load/Stress Test for Support Portal (NUnit/Selenium C#, .NET Core console App.) to check the stability of the application when working under extreme conditions. Created unit testcases for controllers, methods and exceptions, integration test projects for Web services. Deployed projects using Azure CI/CD pipelines, PowerShell for develop, debug, test, deploy the backup and production servers. Used Git Hub to clone, update repository, create, merge branches, search, files diff and restore commits. Designed/implemented seamless data interaction between the applications and IBM DB2 databases, writing complex SQL queries and stored procedures to retrieve, update, and manage data efficiently.

Used tools/technologies: T-SQL requests, triggers, storage procedures and functions, IBM DB2, MS SQL, ADO.NET, LINQ, C#, ASP.NET MVC 5.3, .NET Framework 4.7.2, .Net 6/8, ASP.NET Cookies, Session, Local/Memory Cache, Memory Stream, MS DotNetCompilerPlatform 4.1, MS Build Framework 17.10, Unity 5, NUnit 4.6, Moq 4.20, Selenium web driver, jQuery 3.7.1 (AJAX, data table, validation), Java Script, Razor 3.3, Bootstrap 4/5, JSON, UXFramework, Chart.js 4, HTML controls, MS Visual Studio 2019/2022, SSMS 18, curl, Postman, Swagger UI 3, SoapUI 5.7, NUnit 3 Test Adapter, MS Document Format Open XML, iText 8, SheetJS, SOAP and REST web services, WebApi 5.2, WebPages 3.3, REST API, MS Azure Web Jobs, LDAP, ASP.NET Identity, Okta SSO, Okta's Universal Directory, OAuth 2.0, Owin 1.0, Owin Session, Okta Session, JSON Web Tokens with Public Key Signatures, JWT Bearer Authentication, System Security Cryptography, Zscaler, ETL/ELT operations, Git Hub, Git Bash, Scrum/Kanban Agile. Design patterns: MVC, Singleton, Builder, Factory.

Senior Software Developer – *Akkuyu Nuclear JSC, Turkey (permanent, remote), abroad/USA* *Oct 2020 – Dec 2023*

Developed and maintained the Enterprise level of monolithic structure web apps, single-page apps, system integration projects and reports in corporate network. Worked remotely (MS RDP terminals) with MS Authenticator. Supported legacy ASP.NET WebForms and MVC web apps. Converted legacy reports from FastReport (raw SQL queries) to Open XML and iText. Designed the SPA with Angular for building dynamic and responsive web apps. Used asynchronous requests to the remote servers (Windows server Task Scheduler, SQL server Agent job), and SignalR for notification exchange, SSIS to maintain the databases. Developed WinForms application (based on .NET Core 3.1, VB.NET, Razor, JavaScript) to track errors with ETL processes with MS Dynamics 2015 SL database; enabled users to view data from tables; mask, unmask, encrypt, decrypt the FTP passwords. Implemented MS Visual Studio Installer to create an installation application. Created the detailed description of the functional and technical design. Used MS TortoiseGit, GitLab (Kanban boards and Wikis) to create, clone, delete, merge, find, compare branches in command line. Help Desk 2/3 for ETL and SQL queries on demand. Created and maintained specifications, design documents, user instructions (using GitLab Wiki). Mentored new team members. Implemented SOA using HTTP and REST, designed Web API 2 controllers for dataflow via ESB with JSON files. Published to IIS 10.

Legacy projects (4 projects of monolithic structure): used C#, ASP.NET MVC, .NET Framework, Entity Framework Code First, C# LINQ, ASP.NET REST API / Web API 2 routing (back end), MS SQL Server. Used DevExpress JS, Telerik Kendo UI Web controls, jQuery with AJAX requests (JSON), AspNet.Razor, JavaScript, Bootstrap, Newtonsoft.Json (front end). Used Autofac as IoC (Inversion of Control) container, AutoMapper to map data from one object to another, AspNet.Identity to persist the RoleManager's and UserManager's data to SQL Server, Identity.Owin to generate the security cookies for self-hosting in IIS, Identity.Core to use an external login providers to manage users, passwords, profile data, roles, claims, tokens and email confirmation to support user interface login functionality and LDAP authentication for MS Active Directory.

Modern project: SPA (Single-Page Application) based on ASP .NET 7.0 using Entity Framework Core Code First, C# LINQ, MVC Core, ASP.NET Core Web API (back end), installed PostgreSQL (database). Used TypeScript, Node.js, reactive programming (RxJS), Angular components, Angular CLI for working with services, routing, and forms (front end). Used NLog, Serilog for logging. Implemented multi-platform, ahead-of-time compilation (AstraLinux), standalone w/o runtime preset, used Docker container. For quick access to parameters in JSON file, a caching mechanism is implemented. The database structure corresponds to 3NF (Third Normal Form). Used MS camelCase coding style. The web app has two pages - an administration page (LDAP authentication for MS AD + authorization by group in AD) and a data entry page (w/o authentication and authorization). Implemented uploading data to xlsx document (SheetJS). In TypeScript used HttpClient HTTP GET/POST/DELETE requests to the server (ApiController).

System integration projects: implementing SOA solutions and microservices using HTTP and REST. Designed Web API 2 controller for dataflow between solutions via ESB. Used Swagger, Postman, curl for testing. Developed custom testing tool (ASP.NET Core project) for Web Api (httpClient PostAsync), prepared the test data, deployed as Docker containers. Involved in system integration project with Android app.

Used tools/technologies: T-SQL requests, triggers, storage procedures and functions, ETL/ELT operations, C#, VB.NET, ASP.NET MVC 5.2, ASP.NET WebForms 2.0, ASP.NET Core 3.1, .NET Framework 4.6.1/4.7.2/4.8, Entity Framework 6.4 Model-First, Dapper 2, ADO.NET 2.1, LINQ, ASP.NET REST API/Web API 2, MS SQL Server 2016/2019, StackExchange.Redis 2.1 (NoSQL key-value cache), SignalR 2.4, DevExpress 11.2, Telerik Kendo UI, jQuery 3.6, AJAX, JSON, Angular 16 Material UI, reactive programming (RxJS), TypeScript 5.1.6, Npm 3.5.2,

Component Dev Kit, Angular CLI 16.1.3, Node.js 18.17.1, ASP.NET Core SpaProxy 7.0.9, Docker containers, SheetJS 0.18.5, AspNet.Razor 3.2, JavaScript, Bootstrap 5.1, Autofac 5.2, AutoMapper 10.1, AspNet.Identity (Identity.EntityFramework 2.2.3, Identity.Owin 2.2.3, Microsoft.Owin.Security.Cookies 4.2.0, Identity.Core 2.2.3), LDAP, Cryptography X509, ZipFile, EPPlus 5.6, FastReport 2021.4.11, MS Document Format Open XML, iText 7/8, NLog 4.7.13, NUnit 3.12, MS Visual Studio 2017/2019/2022, MS SQL Server Management Studio 17/19, IBM DB2, pgAdmin 4.7, ASP .NET 7, Entity Framework Core 7.0.9 Code-First, MVC Core 7.0.9, MS Visual Studio Installer Projects, ASP.NET Core Web API, Swagger, Postman, curl, F12 Dev. tools, Waterfall/Agile Scrum/Kanban Trello methodology. Design patterns: MVC, MVVM, Data Transfer Objects, Repository (CRUD), Unit of Work (Transactions), Singleton, Builder, Factory Method, Domain Driven Design, CQRS patterns.

Senior Software Developer – *Invisa Logistic Services LLC (permanent, onsite), Washington, DC* *Mar 2019 – May 2020*
Automated the process of obtaining an international visa (scanning and recognizing a passport; transferring data to a web application; searching, entering, and editing visa applications in a database; auto filling a form on international government websites). Software solution allowed company to reduce the number of employees 5x times. Installed the internal hosting and Windows worker service, developed web/windows/console apps from scratch with .NET Core 3. Developed ETL data integration between third-party products and MS SQL server. Supported 4 different branches of company across the U.S. Reduced cost of Nextiva Voice-IP cloud system from $1600 to $100 monthly.
Used tools/technologies: T-SQL requests, triggers, storage procedures and functions, ETL/ELT operations, C#, ASP.NET MVC, .NET Core, Entity Framework Code First, ADO.NET, LINQ, jQuery, Razor Pages, JavaScript, Bootstrap, AJAX, JSON, ASP.NET Core Hosting bundle, MS Visual Studio, MS SQL Server, Mercurial source control, QNAP NAS TS-439 PRO, Cisco/MikroTik routers, Waterfall development methodology.

Software Developer – *Atlantic Coast Cotton (permanent, onsite), Gainesville, VA* *Jul 2018 – Mar 2019*
Architected and developed dashboard app for recurring ETL data integration between Unix and SQL servers, maintenance operations, reports. Implemented FTP/SFTP/Telnet/SSH access from C#/VB.NET to Unix/MySQL/MS SQL servers, FTP Web Requests/Responses to Unix, SFTP client for access to remote servers, Telnet connection to execute Unix commands from Windows apps environment. Documented business processes, IT instructions and software solutions, supported company's CMS web site. Developed .NET Core Web app to Web scraping data from B2B vendors' Web sites. Refactored Python 2.7 apps to Python 3.4. Implemented SSIS and SSRS. Converted Unix, MS Access, and MS Excel/VBA-based reports to SSRS through Power BI dashboard. Reduced time for business reports from 2 weeks to 2 hrs., Web scraping 3x times.
Used tools/technologies: T-SQL requests, triggers, storage procedures and functions, ETL/ELT operations, C#, ASP.NET MVC, .NET Core, Entity Framework Code First, ADO.NET, LINQ, jQuery, Razor Pages, JavaScript, Bootstrap, AJAX, JSON, MS Visual Studio, MS SQL Server, IBM DB2, AIX, Python 3.47, C# Selenium web driver, Mercurial, ASP.NET Core Hosting bundle, Windows worker service, Waterfall development methodology.

Senior Software Engineer – *Ross Professional Services LLC (contract, onsite), Washington, DC* *Jun 2013 – Jun 2018*
Designed and maintained ASP.NET WebForms, MVC web apps. Installed and maintained VMWare on Sun Fire 4450 server for developing/testing. Redesigned app from .NET Framework to .NET Core. Implemented SOAP web services (MS Exchange, PayPal), developed RESTfull web API with XML/JSON. Automated business processes for job applications, requesting references, text recognition (Word), used Azure WebJobs/ServiceBus to mailflow between staffing agency and applicants/contractors (using link with custom token to Web API controller for time sheet, application form, reference sheet). Web Deploy to Azure web hosting. Designed mobile applications, implemented the responsive Web design, Bootstrap, Razor, User Agent, Java Script, jQuery. Redesigned and maintained web sites from Drupal, Joomla! and PHP to ASP.NET Core web apps. Designed and maintained nonprofits and church .NET Framework web app. Designed .NET Core web applications for online store, automated retail business processes, incl. inventory, sales (bar code scanner), marketing , reports using Web services (AWS, third-party barcode database vendors, B2B dealers), Web API 2, RESTful.
- *OCTO DCPS*. Setting up computers by the beginning of the school year 2013 in DC public schools.
- *Ross Professional Services LLC (Washington, DC).* Redesigned app from Joomla! to C# ASP.NET Framework, after 3 years to C# ASP.NET Core. Implemented SOAP web services (MS Exchange, PayPal), developed RESTfull web API with XML/JSON. Automated business processes for job applications, requesting references, text

recognition (Word), used Azure WebJobs to mailflow between staffing agency and applicants/contractors (using link with custom token to Web API controller (e.g., time sheet, application form, reference sheet). Web Deploy to Azure web hosting. Integrated Azure AD with Office 365 and on-premises Windows Server 2016 Essential. Used SSIS and SQL Server Agent job to upload data from Sage HR database (MySQL) to Azure DB. Installed and maintained a Tax Preparing apps and QuickBooks Pro accounting app.
- *Bluechip Management LLC (Hampton, VA).* Redesigned and maintained web site of company from Drupal to Web application C# ASP.NET Core. Implemented 508(c) compliance. Designed full site search by phrase.
- *Keys To Success (Washington, DC).* Designed and maintained nonprofit's C# .NET Framework web app.
- *Greater New Hope Baptist Church (Washington, DC).* Designed church's C# .NET Framework web app.
- *Cultural Centre (Washington, DC).* Provided technical support (LANs, comps, video bridges and streaming).
- *RIA Global LLC (Washington, DC).* Provided IT support (computers, telecommunications, help desk).
- *Woodward Liquor LLC (Washington, DC).* Designed C# .NET Core web applications for online store. Automated retail business processes, incl. inventory, sales (bar code scanner), marketing, reports.

Used tools/technologies: T-SQL requests, triggers, storage procedures and functions, ETL/ELT operations, C#, ASP.NET WebForms, MVC, .NET Core, Entity Framework Code First, ADO.NET, LINQ, jQuery, Razor Pages, JavaScript, Bootstrap, AJAX, JSON, Web services MS Exchange (EWS Managed API, EWS, SOAP Autodiscover, REST APIs for Office 365), MS OneDrive (XML/SOAP, Live SDK), PayPal (REST API, NVP/SOAP API, Sandbox API, Instant Payment Notification, Payment Data Transfer, OAuth, Transaction Search/Details), Google (Google Maps API), MS Office (Live Workspace), HTML5, CSS3, MS Visual Studio 2013/2015/2017, MS Office 365 Small Business P1 (Exchange/SharePoint/Skype Online), MS Azure, GoDaddy hosting(Parallels Plesk 12), MS SQL Server, Windows Server 2016 Essential, VMWare vSphere 5.1, MS SSIS, SSRS, Windows Vista/7/8/10, MS Office 2007/2010/2013/2016, GoodSync (backup), McAfee Endpoint Protection, Mercurial source control, Waterfall.

IT Engineer – *INTL TV Services Inc. (permanent, onsite), Washington DC* *Oct 2011 – Mar 2013*

Provided support for broadcasting company. Deployed and administered 10 virtual Windows servers, 4 on-premises Windows and Linux servers, enterprise networking environment, information security, telecommunication equipment, specialized equipment for recording and editing sound, video streaming. Designed business-related web applications. Supported company's web site. Maintained virtualization, servers, group policy, desktops, laptops, LAN, VLAN, WAN, routers, switches, printers, VoIP phones.

Used tools/technologies: VMWare vSphere ESX/ESXi hypervisor 4.1, vCenter, Windows Server 2008 R2 EE/Standard, MS SQL Server 2008, MS Exchange Server 2010, Windows7-x64, Red Hat Enterprise Linux CentOS 5.4, Apple Mac OS X 10.7 Lion, MS Active Directory, DNS, DHCP, Exchange Management Shell, Windows Power Shell, MS IIS7, MS Office 2010, Symantec Backup Exec 12, Ethernet and Livewire LANs, ESET NOD32 Antivirus 5.0, TimeForce II (track time), Integra32 (security management), CCTV & DVR, IE, Chrome, Mozilla, XAMPP (Apache HTTP server, Perl 5.14, MySQL, PHP 4/5), XML, HTML, VBA, RDP, Cisco AnyConnect VPN, Cisco Catalyst 9300 48-port switch, Cisco 3845 secure data and voice connectivity router, Cisco ASA 5520 Adaptive Security Appliance, Cisco SGE2010P 48-port Gigabit PoE switch, Cisco IronPort C160 Email Security Appliance, Avaya G430 Branch Gateway (VoIP), Telos AXIA Broadcast console, Telos Zephyr Xstream ISDN codec, Telos NX12 Advanced Digital Broadcast phone system, Telos Z/IP ONE Broadcast codec, Avaya One-X 9608 IP phones.

Team Lead – *Core Banking Software Development Centre (permanent, onsite), abroad* *2007 – 2011*

Automated software for group of eight retail banks: responsible for software development, maintenance and operation support, troubleshooting, monitoring system health, developing and deploying enhancements and configuration changes, and coordinating with key developers from software teams and/or third-party vendors. Provided analytical and technical guidance to senior management and core banking software team and recommended and/or took action to direct the analysis and solutions required; - Maintained daily banking transactions between bank's back-office (RS-Bank/Pervasive SQL/RSL) and front-office (Diasoft/Oracle 11/ Sybase) software (RSL/Delphi Embarcadero/C#). Developed software (RS-Bank) to perform core banking operations - interest calculations on loans and deposits, customer records, balance of payments, and withdrawals (MS SQL server, Transact-SQL, RSL). Performed business process analysis; gathered and analyzed requirements; created design specifications, unit test plans and system test plans; supervised testing, development, production support, and documentation. Managed technical projects' scope, schedule, status and documentation from design to deployment. Hired and managed core banking software development team of

eight software developers (back-office). Hired and co-managed a team of twenty-five software developers (front-office). Managed enterprise IT service desk team (help desk levels 1, 2, 3). Coordinated software developing teams. Created motivational program that increased employee productivity and timeliness by 100%. Fostered productive and collegial working relationships among team members. Managed multiple assignments and balanced workload according to priorities; and determined final assignments in ticket system (Lotus Domino/Notes).

Team Lead – *Bank of International Business (permanent, onsite), abroad* *2005 – 2007*

Managed preparations for the opening of a new bank branch: supervised installation of technology / security. Administered retail banking software (IBSO/Oracle 9), bank cryptography (Signatura3, Verba OW, PGP), payroll software (ARM KBR), VPN networks, Kaspersky software. Administered bank's local, wide, wireless, Internet, and Intranet networks, VoIP systems, Cisco routers and switches, IBM servers, network printers/scanners/faxes. Administered Windows 2003 EE servers, Symantec Backup Exec, MS SQL Server. Hired and managed team of engineers, supervised user support and training (Oracle Reports). Tested, installed, configured, and troubleshot ATM Nixdorf (OS/2), NCR (Windows NT4), POS-terminals; and - Held major position of trust: Responsible for major international currency transfers.

System Administrator – *Agrichemicals corporation (permanent, part-time, remote/onsite), abroad* *2002 – 2011*

For seven years, recognized as top engineer among all branches of international agrichemicals corporation. Installed and maintained servers, networks, tested, installed, configured, and troubleshot computer hardware and software for international corporation. Installed and maintained LAN, WAN and Wi-Fi networks, VoIP.

Used tools/technologies: Windows 2000 Advanced server, Windows 2003 EE server, Windows 2008 R2 EE server, MS ISA 2000/2004/2006, MS TMG-2010, Symantec Corporate Edition 10/11 server, Symantec Endpoint Protection server, IIS 7, Windows Backup, VMware vSphere 4, , vCenter, Citrix MetaFrame thin-client, MS SQL server 2003, MS SQL server 2005, MS SQL server 2008, MS Access DB, PGP encryption, SSL/TLS security protocols, Virtual Private Network (software/hardware), LAN, WAN, MS Active Directory, DNS, DHSP, printers, scanners, desktops, laptops, Cisco 1840 router, Cisco 2960 switch, DSL/Dial-Up/GPRS modems.

Senior Software Engineer – *Pension Fund (permanent, onsite), abroad* *2002 – 2005*

Administered mainframe and regional database of pension fund. Remotely installed and maintained IBM servers for 28 regional offices (thru IBM terminal and modems). Designed and performed SQL requests/reports with AS400 query, converting to MS Access DB. Developed reports, administered projects. Migrated data between IBM DB/2 and MS SQL Server databases. Installed and maintained LAN/WAN networks, telephone/VoIP. Tested, installed, configured, and troubleshot computer hardware and software.

Used tools/technologies: IBM DB/2 AS/400 V3R2 and V5R4 iSeries on IBM AS/50, AS/150, AS/250, 5250 IBM terminal, PL/SQL, RPG III, RPG/400, CLP, IBM Crystal reports, Microsoft Project, MS SSIS, IBM SNA and TCP/IP networks, IBM OS/400 V5R4 iSeries, IBM OS/2 Merlin, Windows Me/2000/XP

Senior Software Engineer – *Regional Bank (permanent, onsite), abroad* *1996 – 2002*

Participated in opening of fifteen new bank branches in multiple regions: supervised installation of technology, security systems, software, and hardware. Responsible for core banking software development, maintenance and troubleshooting (RS-Bank, Btrieve/Pervasive SQL, RSL, and Bank XXI, Oracle 7/8, PL/SQL, Java 2EE). Designed reports (Oracle Reports), stored procedures and SQL requests (Oracle Designer). Migrated enterprise ERP-system to three-tier architecture (Borland EE AppServer, Borland Delphi). Participated in migration from RS-Bank to Bank XXI core banking software; and installed, configured, and troubleshot Novell NetWare/IntranetWare (4.11/5/Small Business) servers, GroupWise 5x, Windows NT4 servers, Windows workstations (3/NT/95/98/XP/Me/2000).

Senior Software Engineer – *Manufacturing facility (permanent, onsite), abroad* *1993 – 1996*

Developed ERP system for Finance Department of corporation manufacturing electrical components for aircraft engines. Handled maintenance and troubleshooting issues for enterprise ERP-system (IBM OS/360/390, DB/2) using Assembler, COBOL, PL/SQL (5250 IBM terminal); and designed database tables, UI, and applications for Finance Department (Clipper, dBase III/IV, FoxPro 2.6, Pascal, Btrieve SQL, and Novell NetWare 3/3.12/4).

LANGUAGES: English, German, Russian;
EDUCATION: M.S. in Mechanical Engineering, MBA, M.S. in Economics, Ph.D. in Economics
CERTIFICATES: ITIL, SLA, Quality Management (X5 Retail Business School, 2003), Angular certificate (2022)

TECHNICAL SKILLS:
Backend: Web Apps, Windows Forms, Web Forms, Console Apps, Single Page Apps, C#, VB.net, .NET 6/7/8, ASP.NET MVC 5, .NET Core 1.2 - 3.1, .NET Framework 4.5 - 4.8, .NET Standard, .NET Platform Extensions, Entity Framework/Core Code First/Database First, ADO.NET, OLE DB, ODBC, C# LINQ, Autofac DI container, AutoMapper, Async/Await methodologies.
Frontend: HTML controls, JQuery, AJAX, UXFrame, Angular Material 16 UI, TypeScript, Telerik Kendo UI, Razor Pages, DevExpress JS, JavaScript, Bootstrap 4/5, JSON, CSS 3, HTML 5, XML, SVG, responsive web design, section 508(c), HTML5 Video, WebVTT, TTML, Inkscape, Gimp2, Photoshop.
Databases: PostgreSQL 15.3, MS SQL Server 2016 - 2019, MS Azure SQL, MySQL SQL/PSM, MS Access, IBM AIX, SQL requests, DML and DDL triggers, storage procedures and functions, T-SQL, C# SQL bulk operations.
Reports: MS SSRS, MS Document Format Open XML (Word, Excel), iText (Pdf), SheetJS, ChartJS, EPPlus, ClosedXML, Fast Report, RDLC Report Viewer, Crystal Reports.
Tools: MS Visual Studio 2017 - 2022, Postman API, Swagger UI 3, SoapUI 5.7, NUnit 3.12/4.6, Moq 4.10/4.20, Selenium web driver, F12 Developer Tools, SSMS, MS Visual Studio Installer, Web Deploy.
Source control: GitHub, GitLab, MS TortoiseGit, Mercurial.
Web services: ServiceNow REST/SOAP, ASP.NET Web API, REST API, MS Office 365/EWS Managed API, AWS, PayPal REST API, NVP/SOAP, Sandbox, IPN/PDT, Transactions, Google Maps/Voice, MS OneDrive.
Web servers: IIS 7/10, Kestrel, Node.js .NET Core internal webhosting, cloud hosting Azure, GoDaddy, myASP.NET, Google Cloud.
Methodology: Waterfall, Agile/Kanban/Scrum.
Virtualization: Docker containers, VMWare 5.1 vSphere, MS Servers working on prem in VM.
System Integration: web services, MS SSIS, SOA, microservices, ETL/ELT, Azure/O365 Integration.
Cloud: Azure App Service, Service Bus, Storage, WebJobs, BLOB, timer/queue triggers, Azure CLI.
Design Patterns: Singleton, Builder, Factory, Data Transfer Objects, Repository (CRUD), Unit of Work (Transactions), Domain-Driven Design, CQRS.
Security: Data Loss Prevention (DLP), Identity and Access Management (IAM), Okta SSO, ASP.NET Identity, cookie-based authentication, OAuth 2.0, Owin 1.0, Owin Session, Okta Session, Entra ID (Azure AD), JWT Bearer Authentication, Zscaler, LDAP authentication, Domain groups authorization, ASP.NET claims-based authorization, multi-factor authentication, Cryptography X509, SSL, PKI, AES, data encryption, tokens.
Logging: Microsoft Extensions Logging, Serilog, NLog.
ERP systems: “RS-Bank” (RSL, Pervasive SQL), “Bank XXI” (Java2EE, Oracle), "AIS PFR" (PL/1, DB2), “X5Retail” (VB.NET, MS Access), “IBSO” (Eclipse, Oracle), MS Dynamics (VB. NET, MS SQL), “Diasoft” (Delphi Embarcadero, Sybase), “Advanced Business Solutions” (COBOL, IBM AIX V5.1)
