FRANK MASTRONARDI

908-858-0954

mastronardif@gmail.com

QUALIFICATIONS:

An articulate IT professional with ten plus years industry experience and more than five+ years **Angular**, Azure, C#, ASP.NET, MVC and SQL Server development. In depth understanding of Agile. Well versed in the complete project life cycle with the proven ability to work in a fast-paced environment. https://mastronardif.github.io/

***TECHNICAL SKILLS*:**

RDBMS/DBMS:	MS SQL Server, Transact- SQL, Oracle, MongoDB, Cosmos DB.
Languages:	C#, **Node.js**, JavaScript, TypeScript, C/C++, Python,
Frameworks/tools:	**Angular 13**, AngularJS 1.5, **.NET Core**, Dot Net 4.5, ASP.NET MVC, WEB API, RESTful, Web Services, jQuery, Node.js, SSIS, XML, XSLT, IIS, ADO, ADF, MEAN Stack
Operating Systems:	**Azure**, Windows Server, GNU Linux

PROFESSIONAL EXPERIENCE:

CONFIDENTIAL TECHNOLOGY INC., NJ **07/19 – PRESENT**

Senior Engineer Full Stack

- Developed an Angular Application for tracking the Coaching experiences of the Branch employees. Application has many Angular reactive forms and uses RxJS, NgRx/store, and application session for efficiency and performance.

- Developed Angular front end for an interfacing with Zelle and the banks back end. Wrote Angular components and GraphQL queries. Wrote C# api's with Dot Net Core to interface with the Bank's payment system.
- Developed Micro Services for Microsoft Service Fabric cluster for an insurance company's internal and external users to access analytical information about U.S demographics.
- Developed Web Api's in C# and ASP.NET CORE that accessed Cosmos Db and SQL Server back end data stores.
- Instrumented a Correlation ID system to track multiple API calls for better tracking and performance analysis.
- Implemented Swagger/Open API for the company's API documentation.
- Automated the orchestration for calling Azure Data Factory/Pipelines and Databricks/Notebooks and external Api's.
- Created Azure DevOps builds with Veracode. Deployed IIS installs with CHEF.

SPRUCE TECHNOLOGY INC., NJ **09/17 – 07/19**

Solution provider

- Lead a team of six people three developers, 2 Q/A's and a business analyst.
- Wrote an internal application in **Angular 7** to view YouTube videos and create documents with embedded videos. The application is written in Angular 7, T**ypeScript** and YouTube API. It uses Oauth to authenticate a user. It has approximately twenty components, eight pipes, services and uses RXJS. It is an HTML 5 Application allowing the users to save and read local files. A demo prototype version is here https://johndog.herokuapp.com/divideos/dist/
- Developed an AngularJS / MVC Web Map application. Coded web services in C# and Stored Procedures in SQL Server. Wrote Stored procedures to get location data from external sources.
- Created SSIS packages to extract data from multiple databases. Created Views and tables.
- Coded modules in ASP.NET, Telerik for listing large data tables. Converted POCO Architecture to JSON Rest Architecture.
- Wrote SSIS scripts to extract data from various public API's for restaurant locations.
- https://abcsearch-nycdohmh.msappproxy.net/ABCEats/#/Search

WELLS FARGO, PRINCETON, NJ **02/17 – 05/17**
.Net /Engineer (contractor)

- Migration lead moving application to PASS - Azure Stack.
- Developed User Interface Screens using ASP .NET Web Forms, Bootstrap/CSS, HTML and C#.NET.
- Premeditate solution files for builds on Microsoft Team Service.
- Create build scripts to automate the build process with Team Services. Modify source code
- and configuration files to work on PAAS. Created Web Jobs to pole files and upload data.

AMERICAN FINANCIAL RESOURCES (AFR CORP), PARSIPPANY, NJ **09/16 – 11/16**
Senior Software Engineer (contractor)

- Developed a system to monitor their applications. Wrote C# and PowerShell Scripts to analyze log files and export results to Application Insights. Developed application Error logging modules to monitor application exceptions and errors.
- Created dashboards with Application Insights to monitor the health of the system and notify respective personal. Deployed Web API apps to the PAAS.
- Tech lead on the build system for Team Services for continuous integration and deployment to the Azure PAAS platform.
- Wrote C# Assemblies to integrate App Insights to existing Web Services.

BANK OF AMERICA, PENNINGTON, NJ **02/16 – 08/16**
Full Stack Developer/Engineer (contractor)

- Technical lead on the in developing a Node.js RESTful API's.
- Used EJS and Express to template the screens.
- Implemented agile best practices, Unit Testing, CI Testing, Test Automation, Pair Programming.
- Developed MEAN stack **RESTful** API in **Node.js** and Express and **MongoDB** to support banks AngularJS frameworks.
- Developed REST API in Express, and MongoDB.

MY MAVENS LLC NEW YORK, NY **03/16 – 01/17**
Full Stack Developer/Engineer (contractor)

- Lead developer on a MEAN **Node.js** Express Meal finding Start Up. Deployed application to AWS.
- Developed the Rest API to interface with MongoDB and Foursquare API.
- Lead and guided junior developers on the project.

RR DONNELLEY WEST CALDWELL, NJ **08/15 – 11/15**
Full Stack Developer/Engineer (contractor)

- Designed ASP.NET MVC, AngularJS SPA web solutions to integrate with legacy ASP.NET pages.
- Wrote Window Services in C# to perform XML/XSLT transforms to generate Responsive HTML files to Email customers and op support the status of the print jobs.
- Fixed and repaired SQL stored procedures and functions to be more performant.
- Created stored procedures to analyze service level agreements and to make sure we were compliant with initial service agreement.

MACMILLAN NEW VENTURES NEW YORK, NY **02/14 – 07/15**
Full Stack Software Engineer

- Lead S/W Engineer on the iClicker https://www1.iclicker.com/ application which allows students to record an-

swers from a physical Remote, iPhone, or Web Application.

- Developed a web MEAN stack application which allowed the students to create Mind Maps. The application was written in Node.js, MongoDB and Express on the back end and AngularJS and GoJS.js on the front end. The database was accessed with Mongoose.
- Wrote a test API framework in Node.js utilizing the WWW-Authenticate Response Header technique so we can test the server performance with JMeter scripts and Postman.
- Wrote JMeter scripts to load test the RESTful APIs on the server.
- Part of a team which enhanced and fixed bugs of a Qt C++ desktop application which ran on the Apple Mac, Windows and GNU-Linux desktops.
- Wrote and XSLT/XML transform process to convert XML to Open Office Excel documents. Wrote XSLT Templates to translate XML files to the Office Open XML standard. This allowed the Excel documents to be open on all three platforms.
- Designed web pages that integrated with the online site to allow the students to purchase clicker subscriptions. The site was written C# ASP.NET and SQL-Server on the back end that used Authorize.Net to accept online payments.

AS AN INDEPENDENT CONTRACTOR WORKED ON THE FOLLOWING ASSIGNMENTS 08/208 – 02/2014

HILL-ROM MEDICAL INSTRUMENTS, CARRY, NC, (07/13 – 02/14)
Software Engineer (contractor)

- Product Development for a Medical Instrument monitoring. Developed an ASP.NET MVC3 App to handle all patient data. Wrote data access layers in ADO.NET to generate reports from SQL Server database.
- Wrote Web Services to access the SQL data store.
- Wrote a proof of concept application in ASP.NET MVC 4 with SignalR monitoring patient data.
- Integrated Chromium Embedded Control into the Windows Forms C# application for better reporting and graphing displays, allowing the developers to create html pages and lite JavaScript support in the WinForms application.

BRANCH BANKING AND TRUST, RALEIGH, NC (11/12 – 05/13)
Software Engineer (contractor)

- Developed Web Services in WCF C# for the banks Phone Channel Systems.
- Released components to IIS on the banks many virtual machines.
- Developed a Web Service for an IVR application to give customers the ability to record messages for later retrieval.
- The back-end voice browser was the Nuance Development Framework.
- Wrote front end ASPX pages that interfaced with the custom web services.
- All code managed by TFS.

MERCK GLOBAL ANIMAL HEALTH SUMMIT, NJ (03/12 –05/13)
Software Engineer (contractor)

- Product Development for an Equine Identification System http://www.eyed.com/.
- Created a ASP.NET Web API web application to interfacing to Excel files to run economic calculations for fish populations.
- The lead C# Dot NET engineer responsible for developing the Equine ID system. Worked w/ offshore teams to maintain and fix the system as needed. Wrote key parts in C# w/ Dot Net 4.0. Moved legacy ASP.NET applications in house for fast responsive upgrades.
- Updated legacy ASP.NET to the latest MVC wire frame.
- Led and mentored developers and shared knowledge through knowledge-sharing presentations.

DONLIN AND RECANO, NEW YORK, NY (03/11 – 02/12)

Software Engineer (contractor)

- Product Development for a Litigation and Tracking System.
- Part of a team developing an ASP.NET MVC 3 application using Telerik and jQuery and JavaScript to allow Attorneys and paralegals to support a major bankruptcy case.
- Wrote key parts with jQuery with the Data Table and Full Calendar and Alert plugins.
- Production support on windows 2003 server. Scheduled services to backup the system. Worked with windows 7, TFS in an agile environment.

VERIZON WIRELESS, WARREN, NJ (08/08 – 03/11)
Software Engineer (contractor)

- Tactical Development for Verizon Wireless call center.
- Designed a Call Center Dashboard in ASP.NET, Perl, C# and Oracle to monitor the state of the call center.
- Wrote XHTML pages to use AJAX, jQuery, XML, XSL and Google Charts to display interactive dashboards.
- Wrote stored procedures and Function in SQL for the Oracle Database to access a very large Database with ADO.NET.
- Lead .NET programmer in a thick-Client C# and Winforms application.
- Wrote Multithreaded gui and server modules to access Verizon host systems and external systems via Web Services and Http.
-

EPIQ SYSTEMS NEW YORK, NY **07/06 – 08/08**
Software Engineer

- Maintained and enhanced an E-Discovery management system.
- Developed C# Winform applications to search large amounts of client data for E Discovery.
- Designed hash routines to quickly search large amounts of data in C#. Enhanced a data staging workflow system in ASP.NET and C# to import data from different sources into a SQL Server 2005 database.
- Wrote Perl scripts on UNIX to synchronize data between the web and the Sybase database.

FIDELITY NATIONAL INFORMATION SERVICES NEW YORK, NY **08/05 – 07/06**
Software Engineer

- Developed an Internet-based cash management system to run in COM+.
- Wrote components in C# to communicate w/ Sql server 2005 and the touch point system.
- Wrote Com components in Visual C++ to communicate w/ Sql Server and the Touch Point System.
- Worked w/ MSXML, ASP and JavaScript to provide a web interface. Wrote T-SQL stored procedures to sync. Data between SQL and the host.
- Monitored the production environment for a 24/7 operation.

EDUCATION:

MANHATTAN COLLEGE, RIVERDALE, NY
Bachelor of Engineering (Electrical Engineering)
